

6.2 OVERLAYS

Clicking on the OVERLAYS button presents the following screen (notice that the Netscape location bar and directory buttons have been hidden).

The list on the left contains all available overlays in UB. The list on the right contains the currently active overlays for the user's tactical display. Overlays are moved between these lists by selecting overlay names and clicking the MOVE button. Scroll bars are provided to view all of the overlays. A total of 500 overlays are allowed (consistent with the 500 overlays available in UB).

Overlays are stored with custom maps, so recalling a custom map activates the overlays associated with the custom (and deactivates any other overlays).
